

# Urinary Tract Infection Vaccine Study

Help us find a way to prevent  
blood stream infections.

People aged 60 years and older,  
with a history of a urinary tract  
infection (UTI), are at an  
increased risk of developing a  
bloodstream infection.

**A clinical research study  
is now enrolling in the  
Tampa Area.**

Compensation for time & travel \$800  
**NO** Insurance is Needed!

**To learn more and see if  
you are eligible for this  
clinical research study:**
